

Pixelanea workshop — facilitator one-pager

45–60 min · local-first · no accounts

Before class (15 min)

- 1. Install `.deb` on lab machines (see `teacher-guide.md`).
- 2. Optional: `sudo apt install zenity` for native file dialogs.
- 3. Copy templates from `docs/workshop/templates/`:
 - `blank-starter.pixelanea` — one per student
 - `happy-face.pixelanea` — finished sprite demo
 - `walk-cycle.pixelanea` — animation demo
- 4. Print student handout (one per pair) and shortcuts reference.

Session at a glance

Time	Activity
5 min	What is pixel art? Show a <code>.pixelanea</code> file
5 min	Open existing template vs Start blank
15 min	Guided draw: face or fruit on 16×16 or 32×32
10 min	Palette presets + lock
10 min	Eraser ("Fix mistakes") + undo
10 min	Optional: Duplicate to 8 frames → Play
5 min	Save As → confirm All changes saved

Key UI phrases

Say	UI label
"Fix mistakes"	Eraser
"Pick a color from your art"	Eyedropper
"Stay inside your color set"	Lock palette
"When it says All changes saved, you're good"	Status bar

If file picker fails

Students see a manual path field. Write a template on the board, e.g. `/home/student/Desktop/my-art.pixelanea`.
